Here are the legislative goals that TSEU members from HHS chose during General Assembly. Join TSEU to join the fight.

1. Oppose and roll back privatization and all other low-quality replacements of public works, such as low-quality AI technologies. Technological advancements should always improve the quality of services and never replace employees with cheap low-quality alternatives. HHSC contracts should increase oversight and accountability which will not be serviced by privatization of public services.

2. Maintain and increase staffing to deal with ongoing case load growth, enact an across-the-board career ladder to reduce staff turnover, and transparency in availability and criteria for merit raises and bonuses.

3. Safe and sanitary work environments including:

- Independent monitoring and stronger regulations defining workplace environments.
- Increase funding for training for all staff levels with a particular focus on support staff, and increased funding for adequate staffing levels.
- Increased funding for sufficient and functional equipment, including software and consumable supplies.
